

Boat Launch Ramp.

In the fall of 2010 we made another investment in our beautiful lake. We installed a ramp for launching boats; available for any lakeside lot owner to use. It is located at the south-east end of the lake on the Association's lot.

The old wooden ramp and concrete approach were removed. The bank was cut back to provide a more gentle slope, and covered with several inches of mixed size gravel then a layer of sand.

Another view of the base.

Rebar was installed.

Concrete poured.

Then each slab was pushed into place sliding on the sand.
